Notes On Remote Learning

- As far as the schedule goes I did not include lengths of time, as it is not practical to try to have your children work and abide by a schedule as they did in school. Just do what works for you, they should be able to get ELA and Math done in about an hour, if they don't I suggest that after an hour goes by they take a break and come back to it later. I have tried to layout a schedule so that it is easier for you and your child during this remote learning period. I highly recommend that your child sticks to the schedule so that the class stays together, and no one falls behind. In the event that your child falls behind it's important to reach out to me so we can get them caught up. During this time your responsibility should be giving them reminders to stay on task, and some assistance as needed. You do not need to take on the responsibility to "teach" your child, just support them as needed. I don't want this to become an overwhelming frustration in your home, you can call or text me anytime and I can hop on the phone or do a google meet with them to walk them through whatever it is they need assistance with! You or your child can contact me at 518-222-6402 text or call, and email at kdiamond@abewing.org any time.

- MONDAY THROUGH FRIDAY I WILL BE ON GOOGLE MEET AT 10am, I will send emails to invite your child and they can click on the link in their email to take them to the meeting. I will be doing lessons and going over work during this time. I will attempt to post those videos on google classroom following the meeting so if they were unable to make the meeting they can re-watch the meeting. This is NOT a requirement, but it will be very helpful that they attend.

- If your child has not accepted the google classroom invite through email they can google google classroom and enter our code of c4rgjtn.

- If your child is unable to log in to their email their username and password would be the first initial of their name then their full last name @abewing.org, for example kdiamond@abewing.org (through gmail) their password is the same password they use to login to their chromebook.

ELA

- I will read the chapter and we will discuss it on google meet, from there your child will re-read the chapter and answer the questions independently. If you can not make it to the reading, don't worry your child can read the chapter on their own or you can read it to or with them. They should be encouraged to answer the

questions on their own, if they are stuck please try to have them refer back to the book to find the answers. As far as the vocabulary and character studies, they should not need assistance. If they do or if they are requiring a lot of assistance, please let me know so that i can better assist them. They are familiar with what is being asked, so they should not be giving you a hard time. If they do please let me know so i can help. **As the book studies are finished please remember to hand the book and the packet in at the school so your child can receive credit for the work they have done!**

- It is also very important that they read for 15 mins each day. I have sent home books that they are able to read, and for students that I have been able to contact, I have sent what they requested to read. If they need more books I can deliver them to you. They can continue to take AR tests through google classroom, as well as continuing to earn beads for their necklace, which I can continue to track from home.

Math

- If you refer to the Math packets, each lesson is mapped out with a to-do page along with the date for that lesson. Some lessons have supporting videos or animated models that will help your child. I will post more as time goes on because I'm continuing to look for more. If you screenshot their score you can text me the pic and i can write it down for our class chart. They may need to rewatch it to get an acceptable score. I want you to remember the online components are not required, but it will help! **As the packets are finished please remember to turn them in at school with their name on them, so they can receive credit for the work they have done!**

Social Studies

- For Social Studies i have chosen for your child to help write about the history that is being made as we speak. Eventhough these times may be disheartening and difficult for children to understand, it is important that we remember what has and is currently happening in our nation and around the world. I am asking that your child put thought and effort into completing one page per social studies periods (Mondays&Wednesdays). This will cover the writing and social studies requirements and the same time. It is expected for them to fill the majority of the lines with complete sentences that make sense. They should also illustrate their writing nicely, I have included crayons for them to do so. I will be completing the same journal with them as we go. They can share what they have written or not that is completely up to them. **I would like them to hand it in by June 9th. I**

would like to read them and give them credit for the work they have done, but I will also send them back home after so they can keep them!

Science

- At this time science is only available through google classroom. What they need to do is to go to the classwork tab and then on the left they will see topics, they will then click on Science & Social Studies, from there they will log into studies weekly. Their username is their full email and the password is science. From there they will click on the newspaper, science and social studies newspapers will appear. When they get into studies weekly they can create a personal avatar which is located in the upper right hand corner. They then can start reading, they can press play and the newspaper will be read to them and they can follow along with the text as it highlights what it is reading. As they read and answer questions they earn coins, which in turn they can buy things for their "rev rat". Each time they log in it will just pick up where they left off, and I can see exactly what they have done. There are test questions and I will record their grade as a reading comprehension grade and a participation grade for science. It is important that they finish a full week before moving onto the next week. I do not expect them to finish a week in a week, because it is a lot. They can work at their own pace. They can feel free to do whatever they want on the website, there are games, science experiment videos, and much more!

Extra's

- The most valuable extras that will benefit your child are, math prodigy, reading and taking AR tests, practicing math facts, and typing games. They can access math prodigy and AR tests through our google classroom and can find typing games through Mrs. Williams google classroom.
- Thank you so much for all your understanding and support through this difficult time, it is greatly appreciated!
